Nationality: Indian | Visa Status: Family Residence Visa (Oman) | Currently based in Oman | Open to relocation

Summary

Computer Science graduate with Honors in Data Science and currently pursuing an MSc in Data Science & AI. Skilled in Power BI, SQL, Python, Microsoft Fabric, and data visualization, with hands-on experience through internships and projects in analytics, machine learning, and business intelligence. Seeking **entry-level** and **traineeship opportunities** in **Data Analytics, Business Intelligence, and Reporting** where I can apply and further develop my analytical and technical skills.

Skills

- Analytics and BI:** Power BI, DAX, Power Query, KPI Reporting, Dashboard Development
- Programming:** Python, Pandas, NumPy
- Databases:** SQL, MySQL, Data Modeling
- Microsoft Fabric:** Lakehouse, Notebooks, Dataflows Gen2, Data Pipelines
- Machine Learning:** Regression, Classification, Feature Engineering, Model Evaluation, Scikit-learn
- Tools and Platforms:** Excel, Git, GitHub, Streamlit, Jupyter Notebook
- Soft Skills:** Analytical Thinking, Problem-Solving, Communication, Adaptability, Team Collaboration

Education

B.E. in Computer Science and Engineering (AI&ML) with Honors in Data Science <i>Finolex Academy of Management and Technology (FAMT), Ratnagiri, India</i> Dec 2021 – Jun 2025	MSc in Data Science and AI <i>BITS Pilani Digital</i> May 2026 – Ongoing
---	--

Experience

AI/ML Intern (Online) – Labmentix	Aug 2025 – Feb 2026
- Developed predictive analytics solutions including Amazon Delivery Time Prediction and Customer Satisfaction (CSAT) Analysis using Python, Pandas, and Scikit-learn, applying machine learning techniques to solve real-world business problems. - Performed data cleaning, preprocessing, feature engineering, exploratory data analysis (EDA), and model evaluation to improve prediction accuracy and generate actionable insights for decision-making. - Built an Agentic AI Travel Planning Assistant using LangChain, Streamlit, APIs, and JSON datasets, enabling automated itinerary generation, personalized recommendations, budget analysis, and AI-driven travel insights.	
Data Analyst Intern (Online) – NullClass	Sep 2025 – Nov 2025
- Performed end-to-end data analysis on Google Play Store datasets using Python, Pandas, and NumPy, including data cleaning, transformation, and exploratory data analysis (EDA). - Developed data models, DAX measures, and Power Query transformations in Power BI to analyze app performance, user sentiment, ratings, installs, and category-wise trends. - Built an interactive Power BI dashboard delivering business insights through KPI tracking, sentiment analysis, and data visualizations to support data-driven decision-making. (GitHub: https://github.com/naaz-719/Google-Play-store-data-analytics-)	

- Developed a machine learning-based House Price Prediction model using Python, Pandas, and Scikit-learn to estimate property prices from housing attributes.
- Applied data preprocessing, feature engineering, exploratory data analysis (EDA), and regression techniques to improve model performance and prediction accuracy.
- Performed model training, evaluation, and hyperparameter tuning, achieving an R² score of 0.65 while following reproducible machine learning workflows. (GitHub: github.com/naaz-719/House-Price-Prediction)

Full-Stack Web Development Intern – Coding Rajas Technologies

Jul 2024 – Aug 2024

Developed full-stack web applications using React.js and MongoDB, implementing responsive UI components and backend integration.

Cyber Security Intern/Trainee – Acmegrade / Prodigy InfoTech

(Jun 2023- July2023) (Aug2024- Sept2024)

Conducted vulnerability assessment, security testing, and basic risk analysis, ensuring secure data handling practices.

Projects

- **GCC Telecom Churn Prediction** – Built an end-to-end telecom churn analytics solution using Microsoft Fabric, SQL, and Power BI to identify retention trends and customer churn drivers.
- **E-commerce Business Analytics**– Designed interactive Power BI dashboards to analyze sales performance, customer behaviour, and revenue trends for business decision-making.
- **Music Genre Classifier** – Developed a machine learning model using Scikit-learn, achieving 78.5% classification accuracy for audio genre prediction.(GitHub:github.com/naaz-719/Music-Genre-Classifier)
- **AI Powered E-Commerce Web App** – Developed AI recommendation system using Flutter, Firebase, Hugging Face, and OpenAI API.
- **AI Healthcare Chatbot & Student Management System** – Designed a web-based solution using HTML, CSS, PHP, and MySQL for data management and automated responses.

Certificates

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional – Oracle
- Oracle Cloud Infrastructure 2025 AI Foundations Associate – Oracle
- AWS Cloud Practitioner Essentials – Amazon Web Services (2025)
- SQL, Data Analytics, Advanced Power BI – LearnTube.ai (2025)
- Power BI Workshop – Office Master (2025)
