

NAAZ MULLA

Data Analyst | Power BI | Python | Fabric | SQL | AI Automation

Rustaq, Oman | +968 76220128 | naazmulla9195@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Nationality: Indian | Visa: Residence Visa (Family Visa) | Open to relocation

SUMMARY

Computer Science graduate specializing in AI and Machine Learning, currently pursuing an MSc in Data Science and AI. Hands-on experience across data analytics, machine learning, and AI automation, using Power BI, Python, and LLM technologies including LangChain, RAG, and AI agents. Built **HirePilot AI**, a full-stack AI career platform, at the Kanz AI Hackathon, earning a **Silver rating** from the AI judging panel. Seeking an **internship** or **traineeship** in **Data Analytics, Junior Data Science, or AI Automation & Digitalization**.

SKILLS

- Data & Analytics:** Power BI, DAX, Power Query, SQL, MySQL, Excel, Dashboard Development, KPI Reporting, Data Visualization
- Machine Learning:** Python, Pandas, NumPy, Scikit-learn, Regression, Classification, Feature Engineering, Model Evaluation, Exploratory Data Analysis (EDA), Predictive Analytics
- AI & Automation:** LLM Integration (Claude, Gemini), LangChain, RAG, AI Agents, Workflow Automation (n8n), Conversational/Voice AI
- Software Engineering:** React, TypeScript, Java, Node.js, Express.js, Flask, REST APIs, Microsoft Fabric, Git, AI-Assisted Development (Vibe Coding)
- Additional Tools:** Docker, Git, GitHub, Vercel, Replit, Streamlit, Jupyter Notebook, Postman, MongoDB
- Soft Skills:** Analytical Thinking, Problem-Solving, Communication, Team Collaboration, Adaptability, Time Management

EDUCATION

MSc in Data Science and AI — BITS Pilani Digital, (2026 - expected 2028)

B.E. in Computer Science and Engineering (AI & ML), Honors in Data Science — Finolex Academy of Management and Technology, Ratnagiri, India (2021–2025)

EXPERIENCE

AI/ML Intern — Labmentix (Remote)

Aug 2025 – Feb 2026

- Built predictive models for delivery-time estimation and customer satisfaction scoring using Python, Pandas, and Scikit-learn, covering data cleaning, feature engineering, and model evaluation.
- Developed Voyage Analytics, an end-to-end travel intelligence platform with flight price prediction, hotel recommendation, and demographic classification, using Flask, Streamlit, and Docker.

Data Analyst Intern — NullClass (Remote)

Sep 2025 – Nov 2025

- Performed end-to-end data analysis on a Google Play Store dataset using Python and Pandas, including data cleaning, transformation, and exploratory data analysis.
- Built an interactive Power BI dashboard with custom DAX measures and Power Query transformations, delivering KPI tracking and sentiment analysis for stakeholders.

Data Science Intern — DevTown (Remote)

Sep 2022 – Dec 2022

- Developed a machine learning-based House Price Prediction model using Python, Pandas, and Scikit-learn, applying data preprocessing, feature engineering, and exploratory data analysis to estimate property prices from housing attributes.
- Performed model training, evaluation, and hyperparameter tuning, achieving an R^2 score of 0.65 through a reproducible machine learning workflow.

Full-Stack Development Intern — Coding Rajas Technologies

Jul 2024 – Aug 2024

- Developed full-stack web application features using React.js for the frontend and MongoDB for the backend, implementing responsive UI components.

Cyber Security Intern / Trainee — Acmegrade / Prodigy InfoTech

Jun–Jul 2023, Aug–Sep 2024

- Conducted vulnerability assessments and risk analysis to support secure data-handling practices.

PROJECTS

HirePilot AI — Kanz AI Hackathon — Silver rating, AI judging panel

- Designed a full-stack platform applying GCC nationalization-quota regulations to score applicant hiring eligibility in advance, using a weighted evaluation model across sponsorship fit, quota headroom, skill match, and salary realism.
- Developed the frontend in React/TypeScript and backend in Express/TypeScript, integrating the Claude API with real-time streaming (SSE) for low-latency AI responses; built an Apify-based scraping pipeline to pull live job listings from Bayt, GulfTalent, and NaukriGulf.
- Implemented a voice-based interview coach using ElevenLabs Conversational AI, and an automated resume-optimization workflow using n8n and Gemini.

AI Business Analytics Studio — Personal project

- Developed a Streamlit business intelligence application covering the full analytics workflow — data upload, cleaning, exploration, forecasting, and reporting — with schema-agnostic column mapping to support diverse datasets without manual setup.
- Implemented chart types, forecasting models with backtesting, Gemini-generated executive summaries, a natural-language data query interface, and automated export to PDF, Excel.

GCC Telecom Churn Prediction — Developed an end-to-end telecom churn analytics solution using Microsoft Fabric, SQL, and Power BI to identify key retention trends and churn drivers.

Music Genre Classifier — Developed a machine learning model using Scikit-learn, achieving 78.5% classification accuracy for audio genre prediction.

AI-Powered E-Commerce App : Developed a product recommendation engine for a Flutter-based shopping application using Firebase, Hugging Face, and the OpenAI API.

CERTIFICATES & RECOGNITION

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- Oracle Cloud Infrastructure 2025 AI Foundations Associate
- AWS Cloud Practitioner Essentials (2025)
- SQL, Data Analytics, and Advanced Power BI — LearnTube.ai (2025)
- Power BI Workshop — Office Master (2025)
- Guinness World Records™ title holder — one of 14,075 participants, largest attendance at an AI video lesson, set with Kanz and Saudi Arabia's Ministry of Human Resources and Social Development (July 2026)
